

Winter trail suggestions for walking and snowshoeing

- 1: trail route is usable (pink line about .9 km). Great opportunity to incorporate an all-season wetland crossing for neighbourhood access.
 - 2: short piece of bypass trail (not yet explored, pink line about .3 km) would help walkers and snowshoers avoid walking on copper trail.
 - 3: people walk at Harvey's hut, so a good place to cross ski trails; create a winter walk/snowshoe (not yet explored, pink line about .5 km) to end of 24-hour trail.
 - 4: descent from road to start of switchback has a slippery steep descent; discourages less sure of foot trail users.
 - 5: [MOU between City and Ski Club](#) allows club to give [snowbikes free access](#) to new taxpayer-funded, non-groomed city trails. However, snowshoers must pay full club skier rates—this inequity needs discussion.
 - 6: Neighbourhood Passes required for Hawk Ridge Trail. See [WCCSC Fees](#) for more information; this needs further discussion.
- Major trail intersections need small sign posts with overview map and close-up maps. [City map page](#) could offer trails as KML.

Copper Haul Road — winter restrictions:

new Copper Ridge to Porcupine Ridge connector trail

1458 m

- #### Winter Trail Legend
- thick bright green: city maintained, always usable trails for walking, snowshoeing, biking — no-vehicles-with-motors (see #6 in suggestions for exception)
 - thin black: powerlines
 - peach: ski club groomed trails, requiring a [WCCSC Pass](#)
 - yellow: neighbourhood trails
 - thick red: winter motorized snowmobile trails
 - dull green: new taxpayer funded city trail network (see #5 in suggestions)
 - pink: suggested trails for better walking, avoiding conflict with ski trails
- Note: Dogs are allowed only on Porcupine Ridge and the Hawk Ridge loop
