

**City Center trails v1**

This concept map allows a person to identify a set of walks, both for recreation, as well as in a more conventional 'active transportation' sense. It's also to encourage people in other parts of the city to look at their own neighbourhood's walkability.

Map created for *whitehorsetwalks.com*, September 7, 2012.  
Working to help build a stronger walking community in Whitehorse.

Red are motorized multi-use trails  
Cyan lines are ski Trails

Pale green lines: major trails  
Dark green lines: neighbourhood trails, proposed active transportation trails, proposed staircases

Distances in km are approximate  
All line work is unverified. Google Earth imagery from a couple of years ago, ie, not completely current.
